

Air purifier by Hindware

HSIL has recently launched the Vayo air purifier. This new air purifier is equipped with a PURI 5 technology, a 5-stage filtration system which purifies particles as small as 0.3 micron in size such as fine dust, smoke, bacteria, pollen and mould spores and its pre-filter traps large particles like human hair, pet dander and dust and also has a high grade True HEPA filter (HEPA 13) which filters 8 times smaller particle than PM2.5 with 99.5 per cent efficiency to ensure clean breathable air. Priced at ₹21,990, the Vayo room air purifier is a CB certified product and has been developed to address the deteriorating air quality that many cities across India are facing. It comes with a user-friendly touch panel with PM2.5 display along with an air quality indicator, which with a light display feature shows the air quality in the room, ranging from green (excellent quality), blue (good quality) to red (Un Healthy Quality). It also has a CADR of 400 m³/hr and up to 50m² coverage areas. It also offers features such as auto mode, 3-speed level, timer, child lock and others.
