Water Purifiers 

₹ 32,690

The technologically advanced Dr. Aquaguard Fusion Ambient 'N' Cold by Eureka Forbes is a blend of form and function. This water purifier eliminates the hassle of refilling bottles and putting them in a refrigerator. The cutting-edge Biotron technology of the purifier magnetises and de-clusters water molecules and unlocks the essential nutrients in the water for better absorption. Its revolutionary patented NutriTron+ cartridge fortifies the water with essential minerals and at the same time balances the pH of water.

₹25,000

Crafted from an amalgamation of digital technology and KENT's patented mineral RO technology, the Kent Superb, a Smart RO (Reverse Osmosis) water purifier by KENT RO Systems Ltd. is one-of-its kind. This touch operated purifier has an inbuilt micro-controller, which senses water quality on real time basis and also displays it on the digital screen. It also senses and displays the total dissolved salts (TDS) in the purified water as well as the filter life and automatically warns the users when the filter life is less than 60 hours.

Price on request

The newly launched RO water purifier by Faber uses Filmtec membranes that are 100 per cent made in USA and untouched by human hands during the manufacturing process. Thus, helping the water purifier perform in the TDS limit of 3000 ppm. The Copper Guard and MAT (Mineral Addition Technology) filter adds essential minerals to the purified RO water, with copper acting as an anti-fouling agent, enhancing the taste of water and making it potable.

₹21,490

Moonbow's stylish and compact water purifier Achelous Premium comes with a jug and has a touch based user interface. Two TDS level indicators on the display panel show input/output water quality. The water purifier is also equipped with the latest Hexapure Technology, a six stage purification process, which removes all germs and bacteria. It has an added benefit of mineral fortification, which makes the water nutritious by adding essential minerals to the water.
