# Moonbow Air Purifiers India

A Moonbow is a lunar rainbow. It is an unique and rare phenomenon because not often a bright moon near to full, rain and dark sky all comes together at the same time. And, without these three factors, a moonbow will not appear. However, the intrinsic characteristics of this marvel lies in its matchless and exceptional quality – awe inspiring! & unexpected! This very feature of the moonbow is what brand 'moonbow' stands for and will deliver through differentiated product offerings beginning with air-purifiers.
