Roundabout

HIGH Five!

IMPROVE THE AIR QUALITY OF YOUR LIVING SPACES — TAKE YOUR PICK FROM THESE TECHNOLOGICALLY ADVANCED AND STYLISH AIR PURIFIERS.

1

HAVELLS INDIA

The new air purifier (available in different capacities of 428 sq ft, 856 sq ft and 1,070 sq ft) comes with advance HEPA technology, which effectively removes major pollutants of the indoor air. It also features an air quality sensor with LED indicator and Ionizer feature.

₹ 21,995 ONWARD

2

HSIL

The Moonbow air purifier, powered by Puri 5 technology, has a five-stage filtration process. The importance of five-stage filtration lies in its ability to sieve away unsafe levels of particulate matter, also known as particle pollution or (PM) up to 2.5 micrometer in size in air.

₹ 12,990 ONWARD

3

SHARP

The new FP-F40E-W model uses a balance combination of active and passive purification systems with Plasmacluster Ion Generator and set of filters. The model uses a dust sensor for monitoring quality of air and works well for rooms with an area of 200 to 300 sq ft.

₹ 24,990

4

PANASONIC INDIA

The model F-PXL45 is equipped to combat the poisonous PM 2.5 virus. It is India's first wall mountable model with a touch panel remote control. The HEPA filter manages the level of harmful particulate matter in the air and the activated carbon filter removes the odour. Clean Sign Indicator, Sleep Mode for eight hours and Filter Life Check are additional features.

₹ 31,995 ONWARD

5

CRUSADERS TECHNOLOGIES INDIA

The air purification technology of XJ-3100 model is based on the principal of Photo-Catalytic Oxidation, with a high-grade HEPA and carbon filter to neutralize dust, pollen, allergens, smoke and other micro-organisms at a very high CADR. The six-stage filtration process employs a 2-in-1 pre-filter mesh, HEPA filter, carbon filter, TiO₂ photo-catalyst filter, UV tube and ionizers.
