Moonbow Introduces Air Purifier with PM 2.5 Indicator And Air Quality Monitor

JANUARY 21, 2017 ~ BANGALORETODAYS

Bangalore, January 20, 2017: The brand Moonbow from the house of HSIL Limited has expanded its product portfolio of air purifiers with the launch of a new, stylish and compact room air purifier AP –A8609UIA with a PM 2.5 Indicator and air quality monitor that keeps a track on the air quality in the room in real time.

The new purifier comes equipped with key features such as:

- Puri 5 technology, which is a 5-stage filtration process having a Pre Filter, a True HEPA Filter, an Activated Carbon Filter, UV Light and Refreshing Energizers. These clean the air and kill almost every pollutant present in the surrounding area.
- PM 2.5 Indicator which tracks the real time pollution of a room and displays the reading
- Washable pre-filter captures large pollutants such as hair strands, etc. and helps in extending the life of advanced purification filters
- The highly-efficient True HEPA filters remove 99.97% of microscopic particles bigger than 0.3 microns bringing in the freshness of pristine forest air into your home
- Activated Charcoal filter is used in conjunction to capture gases and odours.
- UV lamp eliminates almost 99% germs in the vicinity like mould spores, bacteria, viruses & pollen spores
- Attractive display with remote control operation for convenience
