JijoMalayil replied to Moonbow Car Air Purifier Launched in Styling and Accessories

Yesterday, 12:59 PM

A must have car accessory in one of the India's, maybe world's most polluted city is an air purifier. Gurugram/New Delhi is notorious for its pathetic air-quality and also happens to be the place I work/live. The one & half year I have been staying in the city, I can surely feel that my respiratory and immune system has gone for a toss. So, when Moonbow send across its new car air purifier, I jumped on the opportunity to test it, and maybe feel a little relief from this maddening pollution.

The unit weighs nearly 500 grammes can be placed on the dashboard (being well-shaped it stays intact even during hard cornering).
